Washington, D.C. 20223

Date: 11/8/2023

Jason Leopold

File Number: 20230737

Dear Requester:

This is the final response to your Freedom of Information Act (FOIA) request, originally received by the United States Secret Service (Secret Service) on July 14, 2023, for information pertaining to emails, text messages, photographs, memos, letters, directives, intelligence bulletins, threat assessments, after action reports, suspicious activity reporting, and open-source intelligence/social media monitoring reports, referencing the cocaine found in the West Wing of the White House.

After a detailed review of all potentially responsive records, 102 pages were released and 34 pages were withheld in their entirety. After considering the "Foreseeable Harm" standard, outlined in Title 5 U.S.C § 552(a)(8)(A)(i) and Department of Justice guidance, exemptions under FOIA Statute Title 5 U.S.C. § 552, and/or the PA Statute Title 5 U.S.C. § 552a, have been applied where deemed appropriate.

Enclosed are the documents responsive to your request, as well as a document that explains the exemptions in more detail. Withheld information is pursuant to the exemptions marked below.

Section 552 (FOIA)

(b) (1)	(b) (2)	(b) (3) Statute:		
(b) (4)	(b) (5)	(b) (6)	(b) (7) (A)	(b) (7) (B)
(b) (7) (C)	(b) (7) (D)	(b) (7) (E)	(b) (7) (F)	(b) (8)

Please be advised, in the processing of this FOIA request, no fees are being assessed.

If you deem our decision an adverse determination, you may exercise your appeal rights. Should you wish to file an administrative appeal, your appeal should be made in writing and received within ninety (90) days of the date of this letter, by writing to: Freedom of Information Appeal, Deputy Director, U.S. Secret Service, Communications Center, 245 Murray Lane, S.W., Building T-5, Washington, D.C. 20223. If you choose to file an administrative appeal, please explain the basis of your appeal and reference the case number listed above.

Additionally, you have the right to seek dispute resolution services from the Office of Government Information Services (OGIS) which mediates disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. Please note that contacting the Secret Service's FOIA Program and/or OGIS **is not** an alternative to filing an administrative appeal and **does not** stop the 90-day appeal clock. You may contact OGIS at: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001. You may also reach OGIS via e-mail at ogis@nara.gov, telephone at 202-741-5770/toll free at (877) 684-6448, or facsimile at (202) 741-5769.

If you need any further assistance, or would like to discuss any aspect of your request, please contact our FOIA Public Liaison Kevin Tyrrell, at (202) 220-1819. Alternatively, you may send an email to foia@ussd.dhs.gov.

FOIA File No. 20230737 is assigned to your request. Please refer to this file number in all future communication with this office.

Sincerely,

Kevin L. Tyrrell
Freedom of Information Act Officer
Office of Intergovernmental and Legislative Affairs

Enclosure:
FOIA and Privacy Act Exemption List

**FREEDOM OF INFORMATION ACT
SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552**

Provisions of the Freedom of Information Act do not apply to matters that are:

- (b) (1) (A) specifically authorized under criteria established by an Executive Order to be kept Secret in the interest of national defense or foreign policy; and (B) are in fact properly classified pursuant to such Executive Order;
- (b) (2) related solely to the internal personnel rules and practices of any agency;
- (b) (3) specifically exempted from disclosure by statute (other than section 552b of this title), if that statute: (A)(i) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (ii) establishes particular criteria for withholding or refers to particular types of matters to be withheld; and (B) is enacted after the date of enactment of the OPEN FOIA Act of 2009;
- (b) (4) trade secrets and commercial or financial information obtained from a person and is privileged or confidential;
- (b) (5) inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency; provided that the deliberative process privilege shall not apply to records created 25 years or more before the date on which the records were requested;
- (b) (6) personnel files and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;
- (b) (7) records or information compiled for law enforcement purposes, but only to the extent that the information: (A) could reasonably be expected to interfere with enforcement proceedings; (B) would deprive a person of a right to a fair trial or an impartial adjudication; (C) could reasonably be expected to constitute an unwarranted invasion of personal privacy; (D) could reasonably be expected to disclose the identity of a confidential source, including a State, local, foreign agency or authority, or any private institution that furnished information on a confidential basis, and/or when records/information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source; (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law; (F) could reasonably be expected to endanger the life or physical safety of any individual;
- (b) (8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for regulation or supervision of financial institutions; and
- (b) (9) geological and geophysical information and data, including maps, concerning wells.

**PRIVACY ACT
SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552a**

The provisions of the Privacy Act do not apply to:

- (d) (5) material compiled in reasonable anticipation of a civil action or proceeding;
- (j) (2) material reporting investigative efforts pertaining to enforcement of criminal law including efforts to prevent, control, or reduce crime or apprehend criminals;
- (k)(1) material that is currently and properly classified pursuant to an Executive Order in the interest of national defense or foreign policy;
- (k) (2) material compiled during investigations for law enforcement purposes (with certain exemptions);
- (k) (3) material maintained in connection with providing protective services to the President of the United States or other individuals pursuant to section 3056 of Title 18;
- (k) (5) investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or for access to classified information, but only to the extent that the disclosure of such material would reveal the identity of the person who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence; and
- (k) (6) testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service-the disclosure of which would compromise the objectivity or fairness of the testing or examination process.

CASE SUMMARY

On 07/02/23, USSS/UDW reported a small bag containing an unknown white, powdery substance was located at the White House. (b)(7)(E) The West Wing was evacuated as a result of the finding, and 17th Street from H Street NW to New York Avenue NW was closed. The substance was tested and deemed not hazardous. Media reports said the DCFD field test indicated the substance was cocaine.

Thank you (b)(6); (b)(7)(C) for the live play by play while I typed this.

Starting time Approx 1745 UD advised of a small ziploc bag approximately less than 1” in by 1” in the cell phone lockers by (b)(6); (b)(7)(C); (b)(7)(E) was confident it was drug related thus the phone call to UD CRIME SCENE.

(b)(6); (b)(7)(C) and other UD officials asked for TSD to brief as general awareness and ask for recommendation as to what to do (b)(6); (b)(7)(C) was en route another escort and asked if what the specific concern was. They identified they wanted to go the crime scene route due to their confidence level it was drug related. TSD Tech Desk informed UD that he was willing to call AHB response when UD confirmed the Crime Scene route. There were no signs or symptoms reported from any of the UD personnel who had opened the phone closet or from any of the tour guests. TSI conducted his escort and then returned to West Exec. Ave. as Crime Scene arrived.

Crime scene asked for additional TSD assistance/equipment and when briefed it would take approximately 1 hour for the response person to arrive and while on the phone identifying other courses of actions UD crime scene entered the scene at (b)(7)(E) for their testing. They then returned with a non conclusive result and asked the Tech Desk for a more technical response.

(b)(6); (b)(7)(C) provided a preemptive test for radiation, thermal changes, or any off gassing. All tests came back with no results. It was (b)(6); (b)(7)(C) recommendation that the substance be over-packed for transport to a lab for testing. When asked what the substance was, (b)(6); (b)(7)(C) informed the UD that he couldn't identify what it was but could identify what it was not doing.

Again, (b)(6); (b)(7)(C) informed UD he was able to call AHB response and have a field test done but it would still need to be transported to a lab for confirmation, UD said they do not transport unknown substances. When (b)(6); (b)(7)(C) wasn't able to positively identify what the substance was, the on phone Inspector (b)(6); (b)(7)(C) confirmed they cannot transform unknown substances which would need to be declared Suspicious. It was at this time (b)(6); (b)(7)(C) went over the radio and declared the scene suspicious leading to a DC Fire Response.

Good evening,

I apologize for the late email. I was just notified that the Deputy Director of the FBI received a request from USSS executive leadership to retain the sample and conduct additional forensic analysis at the FBI lab at Quantico. I don't have any further info, but I wanted to pass this so that confirmations could be made if you had not received that through the appropriate channels.

Subject: Re: 23-260 / WW Evidence

Good evening everyone,

I just got off a Carplane and have about 60 emails to catch up on, but per my discussions with TSD executive leadership just before taking off, HQ was going to designate either CSSU or a squad from WFO to handle the transfer. TSD will not be picking up the evidence. TSD's role at this point was to coordinate with our partners at NBFAC to ensure they were in contact with whatever group was designated by USSS HQ. It appears that CSSU is that group

Good Evening,

(b)(6);
 FBI Special Agent (b)(7) just called. The Item we collected from the West Wing is not at the NBFAC Lab, it is already in Quantico, per USSS request, and has been tested and processed for prints and DNA (both inconclusive). The item still needs to be given authorization to be released and then properly packaged for transport. When it is authorized to be released, (b)(7)(E) Only after it arrives to FBI WFO, can someone from CSSU respond and retrieve it. Special Agent (b)(6); (b)(6); (b)(6);

Special Agent (b)(6); (b)(6); (b)(6); is still waiting for the final lab report, and authorization to have the item sent back to DC from his higher-ups, who are supposedly talking with USSS 8th floor staff.

Our offices reviewed the report below relating to suspected cocaine being discovered at the White House. We have the following questions that we request you respond to:

1. Provide the date/time that the substance was discovered.
2. Where in the White House was this substance discovered?
3. Who discovered this substance?
4. Has USSS interviewed White House staff related to the discovery of this substance?
5. Has USSS conducted finger print analysis on the container that held this substance? If so, what were the results of that analysis?
6. Which USSS unit is running this investigation?

Secret Service Examining How Suspected Cocaine Ended Up at the White House

An initial test of the white powdery substance found inside the White House on Sunday evening showed it was cocaine. President Biden and his family were away when it was discovered.

The White House in Washington. Credit...Haiyun Jiang for The New York Times

By **Katie Rogers**

Reporting from Washington

July 4, 2023

A small amount of a white powdery substance was found in the White House on Sunday evening, according to a person familiar with the episode, and an initial test by emergency response workers determined that it was cocaine.

President Biden and his family were away at Camp David when a uniformed Secret Service agent found the substance during a patrol of the West Wing around 6 p.m. on Sunday, the person said, prompting a brief shutdown of some of the White House campus as response workers assessed whether the substance was hazardous.

Later that evening, a test of the substance by hazmat crew officials returned a result: “We have a yellow bar saying cocaine hydrochloride,” an official said on a dispatch sent at 8:49 p.m. and logged by a website that gathers the agency’s radio communications.

A person familiar with the investigation, who spoke on the condition of anonymity to discuss an open inquiry, said that the radio dispatch discussing the test of the substance was placed

between the District of Columbia Fire Department's hazmat team and other officials within the department.

Anthony Guglielmi, a spokesman for the Secret Service, said that the substance had been found in a "work area of the West Wing" and that another dispatch that said the substance had been found in a White House library was incorrect.

In a statement, Mr. Guglielmi said "the item was sent for further evaluation and an investigation into the cause and manner of how it entered the White House is pending."

He did not confirm or dispute the initial finding that the powder was cocaine.

Vito Maggiolo, a spokesman for the District of Columbia Fire Department, declined to confirm the contents of any of the dispatches, but said officials with the department "were requested to assist the Secret Service as they conducted an investigation."

On Tuesday morning, Mr. Biden returned to the White House with several of his family members.

PUBLIC NARRATIVE

On Sunday, July 2nd, 2023, at approximately 1746 hours, RO-1 received a radio call for a suspicious package in the outer lobby area of the White House. The package contained an unknown substance. DCFD Hazmat was requested and deemed the package safe. All emergency personnel cleared the scene.

INTERNAL NARRATIVE

On Sunday, July 2nd, 2023, at approximately 1746 hours, RO-1 (b)(6); (b)(7)(C) responded to assist (b)(6); (b)(7)(C), who was held with a white powdery substance. R-1 (b)(6); (b)(7)(C) had notified Secret Service personnel he discovered the package containing the white powdery substance in the outer lobby area of the West Wing of the White House. AS-1 requested United States Secret Service Crime Scene Search Unit (CSSU), to respond to conduct a test on the substance.

CS-1 (b)(6); (b)(7)(C) and CS-2 (b)(6); (b)(7)(C) responded as CSSU to test the white powdery substance for narcotics. CS-1 conducted the preliminary field chemical test on the outer packaging and the inner flap of the small baggie containing the substance. CS-1 advised RO-1 and AS-1 that the test was inconclusive. AS-1 then requested United States Secret Service Technical Security Division to respond to conduct further tests on the substance. Technical Security Division (b)(6); (b)(7)(C) responded and conducted further testing on the package. All tests returned inconclusive on the substance.

At 1918 hours AS-1 deemed the small baggie containing the white powdery substance suspicious. AS-1 then requested for DC Fire Hazmat to respond for the substance. RO-1, AS-2 (b)(6); (b)(7)(C), and AS-3 (b)(6); (b)(7)(C) immediately began evacuating the West Wing of the White House. RO-1 then requested all vehicular traffic as well as pedestrian traffic on 17th ST NW DC between H St and Constitution Ave to 18th St NW DC to be shutdown. Closures were then reduced to New York Ave NW DC to the South, 18th St to the west and H St to the North. (b)(7)(E)

At Approximately 2010 hours, DC Fire Hazmat 1 responded to evaluate the unknown white powdery substance. Engine 23 and Medic 1 with DC Fire also responded to stage at a safe distance from the scene in order to facilitate a quick response to any adverse outcomes.

At approximately 2028 hours, DC Fire Hazmat 1 Technicians (b)(6); (b)(7)(C) made entry into the outer lobby containing the baggie filled with the white powdery substance. Technicians (b)(6); (b)(7)(C) conducted chemical tests on the substance which returned presumptive positive for opioids and amphetamines.

FBI WMD Special Agent (b)(6); (b)(7)(C) responded to take possession of the substance to conduct further testing at approximately 2051 hours. (b)(6); (b)(7)(C) took full possession of the substance at approximately 2200 hours. All emergency personnel then departed the scene.

Subject: Re: Powdery Substance found in White House

On Sunday evening, the White House complex went into a precautionary closure as officers from the Secret Service Uniformed Division investigated an unknown item found inside a work area. The DC Fire Department was called to evaluate and quickly determined the item to be non-hazardous. The item was sent for further evaluation and an investigation into the cause and manner of how it entered the White House is pending.

On Background:

There is some incorrect reporting, indicating this item was found inside of the executive mansion. That is incorrect. The item was discovered inside of a work area of the west wing.

Some people who received this message don't often get email from (b)(6); (b)(7)(C)@washingtontimes.com. [Learn why this is important](#)

Hello,

My name is (b)(6); (b)(7)(C) and I am a new Capitol Hill reporter for the Washington Times, and as the new guy I am also working on the Fourth. I'm reaching out regarding reports of the discovery of a powdery substance causing the evacuation of the White House on Sunday. Is there an official report of the incident? There have also been reports that the substance was field tested and found to be cocaine. Is that accurate, and how long will it take for more conclusive testing to be done?

Thanks,

(b)(6); (b)(7)(C)

MEDIA RELEASE

United States Secret Service
Department of Homeland Security

July 12, 2023

Official Statement on the Investigation of a Substance Found in the White House

WASHINGTON - On the evening of July 2, officers from the U.S. Secret Service Uniformed Division found an unknown substance inside a vestibule leading to the lobby area of the West Executive Avenue entrance to the White House.

The substance was located inside a receptacle used to temporarily store electronic and personal devices prior to entering the West Wing.

Following the discovery, safety closures were implemented around the White House. This response was designed to ensure that the found substance was not a biological or radiological material that threatened the security of the White House. As such, the substance was field tested and determined to not be a hazardous compound.

Testing conducted by the District of Columbia Fire and Emergency Medical Services Department indicated that the found powder tested preliminarily positive for the presence of cocaine. The substance and packaging was treated as evidence and sent to the U.S. Department of Homeland Security's National Biodefense Analysis and Countermeasures Center, which analyzed the item for any biothreats. Tests conducted at this facility came back negative and gave formal confirmation that the substance was not biological in nature.

The substance and packaging underwent further forensic testing. The substance was analyzed for its chemical composition. The packaging was subjected to advanced fingerprint and DNA analysis. Both of these analyses were conducted by the Federal Bureau of Investigation's crime laboratory given their expertise in this area and independence from the investigation.

While awaiting the FBI's results, the Secret Service investigation into how this item entered the White House continued. The investigation included a methodical review of security systems and protocols. This review included a backwards examination that spanned several days prior to the discovery of the substance and developed an index of several hundred individuals who may have accessed the area where the substance was found. The focal point of these actions developed a pool of known persons for comparison of forensic evidence gleaned from the FBI's analysis of the substance's packaging.

On July 12, the Secret Service received the FBI's laboratory results, which did not develop latent fingerprints and insufficient DNA was present for investigative comparisons. Therefore, the Secret Service is not able to compare evidence against the known pool of individuals. The FBI's evaluation of the substance also confirmed that it was cocaine.

There was no surveillance video footage found that provided investigative leads or any other means for investigators to identify who may have deposited the found substance in this area. Without physical evidence, the investigation will not be able to single out a person of interest from the hundreds of individuals who passed through the vestibule where the cocaine was discovered.

For questions concerning this release, please contact the U.S. Secret Service Office of Communication and Media Relations at 202-406-5708.

The United States Secret Service was originally founded in 1865 for the purpose of suppressing the counterfeiting of U.S. currency. Now an agency within the Department of Homeland Security, the Secret Service is widely known for its protective mission in safeguarding the nation's highest elected officials, visiting foreign dignitaries and events of national significance. Today, the Secret Service maintains a unique integrated mission of protection and investigations, as one of the premier law enforcement organizations charged with investigating cyber and financial crimes.

Hi,

I hope you are well.

I was wondering if you had a statement about the hazmat incident at the White House overnight and can confirm that the substance found/that sparked the incident was cocaine hydrochloride.

Best,

(b)(6); (b)(7)(C)

July 13, 2023

Official Statement on the Investigation of a Substance Found in the White House

WASHINGTON - On the evening of July 2, officers from the U.S. Secret Service Uniformed Division found an unknown substance inside a vestibule leading to the lobby area of the West Executive Avenue entrance to the White House.

The substance was located inside a receptacle used to temporarily store electronic and personal devices prior to entering the West Wing.

Following the discovery, safety closures were implemented around the White House. This response was designed to ensure that the found substance was not a chemical or radiological material that threatened the security of the White House. As such, the substance was field tested and determined to not be a hazardous compound.

Testing conducted by the District of Columbia Fire and Emergency Medical Services Department indicated that the found powder tested preliminarily positive for the presence of cocaine. The substance and packaging was treated as evidence and sent to the U.S. Department of Homeland Security's National Biodefense Analysis and Countermeasures Center, which analyzed the item for any biothreats. Tests conducted at this facility came back negative and gave formal confirmation that the substance was not biological in nature.

The substance and packaging underwent further forensic testing. The substance was analyzed for its chemical composition. The packaging was subjected to advanced fingerprint and DNA analysis. Both of these analyses were conducted by the Federal Bureau of Investigation's crime laboratory given their expertise in this area and independence from the investigation.

While awaiting the FBI's results, the Secret Service investigation into how this item entered the White House continued. The investigation included a methodical review of security systems and protocols.—

For questions concerning this release, please contact the U.S. Secret Service Office of Communication and Media Relations at 202-406-5708.

The United States Secret Service was originally founded in 1865 for the purpose of suppressing the counterfeiting of U.S. currency. Now an agency within the Department of Homeland Security, the Secret Service is widely known for its protective mission in safeguarding the nation's highest elected officials, visiting foreign dignitaries and events of national significance. Today, the Secret Service maintains a unique integrated mission of protection and investigations, as one of the premier law enforcement organizations charged with investigating cyber and financial crimes.

This review included a backwards examination that spanned several days prior to the discovery of the substance and developed an index of several hundred individuals who may have accessed the area where the substance was found. The focal point of these actions developed a pool of known persons for comparison of forensic evidence gleaned from the FBI's analysis of the substance's packaging.

On July 12, the Secret Service received the FBI's laboratory results, which did not develop latent fingerprints and insufficient DNA was present for investigative comparisons. Therefore, the Secret Service is not able to compare evidence against the known pool of individuals. The FBI's evaluation of the substance also confirmed that it was cocaine.

There was no surveillance video footage found that provided investigative leads or any other means for investigators to identify who may have deposited the found substance in this area. Without physical evidence, the investigation will not be able to single out a person of interest from the hundreds of individuals who passed through the vestibule where the cocaine was discovered. At this time, the Secret Service's investigation is closed due to a lack of physical evidence.

The U.S. Secret Service takes its mission to protect U.S. leaders, facilities, and events seriously and we are constantly adapting to meet the needs of the current and future security environment.

(b)(6); (b)(7)(C) wrote:

Nothing really new on this one - we've sent the item for additional testing and are investigating.

Here's a statement on it

On Sunday evening, the White House complex went into a precautionary closure as officers from the Secret Service Uniformed Division investigated an unknown item found inside a work area. The DC Fire Department was called to evaluate and quickly determined the item to be non-hazardous. The item was sent for further evaluation and an investigation into the cause and manner of how it entered the White House is pending.

On Background:

There is some incorrect reporting, indicating this item was found inside of the executive mansion. That is incorrect. The item was discovered inside of a work area of the west wing.

AP

WASHINGTON (AP) — No fingerprints or DNA turned up on the baggie of cocaine found in a lobby at the White House last week despite a sophisticated FBI crime lab analysis and surveillance footage of the area didn't identify a suspect, according to a summary of the Secret Service investigation obtained by The Associated Press. There are no leads on who brought the drugs into the building.

U.S. Secret Service agents found the white powder during a routine White House sweep on July 2, in a heavily trafficked West Wing lobby where staff go in and out, and tour groups gather to drop their phones and other belongings.

“Without physical evidence, the investigation will not be able to single out a person of interest from the hundreds of individuals who passed through the vestibule where the cocaine was discovered,” Secret Service  is said in the summary.

Subject: Please Read - Supplemental Needed for Suspicious Package CCN (b)(7)(E)

Good Morning Officer (b)(6); (b)(7)(C)

At some point this afternoon, CSSU (b)(6); (b)(7)(C) will be responding to FBI/WFO to pick up the now confirmed Cocaine from your suspicious package report on July 2, 2023 CCN (b)(6); (b)(7)(C); (b)(7)(E)

will be transporting the item to (b)(7)(E) to place on the books for Destruction. After (b)(6); (b)(7)(C) completes he will contact you with the book and page number. At this point you need to log into (b)(7)(E)

(b)(7)(E) and complete a supplemental for this report which states the item was determined to be Cocaine and it was transported to (b)(7)(E) for Destruction placed on book ____ and page ____ . (b)(6); (b)(7)(C) will have the COC for you as well which you can include in the supplemental narrative. There is no need to draw new numbers or change any classification. Do not do any of this until (b)(6); (b)(7)(C) contacts you and advises he has placed the item on the book. Let me know of any questions, thanks.

Insp. (b)(6); (b)(7)(C)

USSS/UDW

PUBLIC NARRATIVE

On Sunday, July 2nd, 2023, at approximately 1746 hours, RO-1 received a radio call for a suspicious package in the outer lobby area of the White House. The package contained an unknown substance. DCFD Hazmat was requested and deemed the package safe. All emergency personnel cleared the scene.

INTERNAL NARRATIVE

On Sunday, July 2nd, 2023, at approximately 1746 hours, RO-1 [REDACTED] responded to assist AS-1 [REDACTED], who was held with a white powdery substance. R-1 [REDACTED] had notified Secret Service personnel he discovered the package containing the white powdery substance in the outer lobby area of the West Wing of the White House. AS-1 requested United States Secret Service Crime Scene Search Unit (CSSU), to respond to conduct a test on the substance.

CS-1 [REDACTED] and CS-2 [REDACTED] responded as CSSU to test the white powdery substance for narcotics. CS-1 conducted the preliminary field chemical test on the outer packaging and the inner flap of the small baggie containing the substance. CS-1 advised RO-1 and AS-1 that the test was inconclusive. AS-1 then requested United States Secret Service Technical Security Division to respond to conduct further tests on the substance. Technical Security Division [REDACTED] responded and conducted further testing on the package. All tests returned inconclusive on the substance.

At 1918 hours AS-1 deemed the small baggie containing the white powdery substance suspicious. AS-1 then requested for DC Fire Hazmat to respond for the substance. RO-1, AS-2 [REDACTED] and AS-3 [REDACTED] immediately began evacuating the West Wing of the White House. RO-1 then requested all vehicular traffic as well as pedestrian traffic on 17th ST NW DC between H St and Constitution Ave to 18th St NW DC to be shutdown. Closures were then reduced to New York Ave NW DC to the South, 18th St to the west and H St to the North. [REDACTED]

At Approximately 2010 hours, DC Fire Hazmat 1 responded to evaluate the unknown white powdery substance. Engine 23 and Medic 1 with DC Fire also responded to stage at a safe distance from the scene in order to facilitate a quick response to any adverse outcomes.

At approximately 2028 hours, DC Fire Hazmat 1 Technicians [REDACTED] made entry into the outer lobby containing the baggie filled with the white powdery substance. Technicians [REDACTED] conducted chemical tests on the substance which returned presumptive positive for opioids and amphetamines.

FBI WMD Special Agent [REDACTED] responded to take possession of the substance to conduct further testing at approximately 2051 hours. [REDACTED] took full possession of the substance at approximately 2200 hours. All emergency personnel then departed the scene.

SUPPLEMENTAL INFORMATION:

On July 12, 2023, approximately 1751 hours, Crime Scene Search Unit (CSSU) supervisor (b)(6); (b)(7)(C) Crime Scene Tech (b)(6); and Crime Scene Tech (b)(6); responded to the FBI Washington Field Office (WFO), 601 4th Street, N.W., to retrieve a package containing a white powdery substance. At 1801 hours, the item was transferred from FBI custody to USSS CSSU custody. (b)(7)(D)

(b)(7)(E)		
(b)(7)(D)		
(b)(7)(D)	Cocaine and sodium bicarbonate were identified within the Item 1-1 powder.”	(b)(7)(D)
(b)(7)(D)		

Test results did not identify an individual responsible for the placement of the item within the West Wing of the White House Complex on July 2, 2023. On July 14, 2023, the white powdery substance and packaging, item #1, was transported to (b)(7)(E) and placed on the property/evidence book for 'Destruction'.

Chain of Custody (COC):

Item #1 - Bag of unknown white powdery substance

COC: Item #1 was field tested by the undersigned Technician and then field tested by (b)(6); (b)(7)(C) tem#1 remained in (b)(7)(E) until it was removed by DCFD Firefighter Technicians (b)(6); (b)(7)(C) and (b)(6); (b)(7)(C) for further testing. Item #1 was then transferred to DCFD Firefighter Technician (b)(6); (b)(7)(C) for packaging. The undersigned Technician received Item #1 from DCFD (b)(6); (b)(7)(C) after it was safely packaged. The undersigned Technician then turned over Item #1 to FBI Special Agent (b)(6); (b)(7)(C) at 2200 hours.

July 12, 2023

Item #1 - Bag of unknown white powdery substance Identified as Cocaine by FBI laboratory.

Item #2 - DNA secondary evidence from Item #1

July 12, 2023

COC: Item#1 & Item #2 were collected by FBI Special Agent (b)(6); (b)(7)(C) Item #1 & Item #2 were transferred to USSS Technician (b)(6); (b)(7)(C) Item#1 & Item #2 were placed in temporary storage locker (b)(7)(E) in the CSSU office.

July 14, 2023

COC: Item #1 was removed from temporary storage locker (b)(7)(E) by USSS (b)(6); (b)(7)(C) transferred to (b)(7)(E) station for destruction and placed on (b)(7)(E)

COC: Item #2 was transferred to USSS FSD Laboratory for processing to allow for long term storage. Item #2 was transferred from USSS FSD Laboratory to USSS (b)(6); (b)(7)(C) and stored in the evidence vault in the CSSU office for preservation prior to disposal consistent with agency policy.

Case Status: Case closed (No further investigative leads)

More information:

A 1" by 1" bag of white powdery substance was found near where pass holders put their phones when going into the (b)(7)(E) here. UD Crime Scene tested it for drugs but came back inconclusive. TSD couldn't determine what it was. Closures were made for caution.

DCFEMS HAZMAT is on scene as of this email.

BELOW ARE THE RESULTS OF THE EXAMINATIONS CONDUCTED BY THE IDENTIFICATION BRANCH

CHAIN OF CUSTODY:

Item #1

CoC: (July 2nd 2023) Item #1 was field tested by the undersigned Technician and then field tested by TSD/TSI (b)(6); (b)(7)(E) Item #1 then remained in (b)(7)(E) until it was removed by DCFD Firefighter Technicians (b)(6); (b)(7)(C) and (b)(6); (b)(7)(C) for further testing. Item #1 was then transferred to DCFD Firefighter Technician (b)(6); (b)(7)(C) for packaging. The undersigned Technician received Item #1 from DCFD (b)(6); (b)(7)(C) after it was safely packaged. The undersigned Technician then turned over Item #1 to FBI Special Agent (b)(6); (b)(7)(C) at 2200 hours.

(July 12th, 2023) Item #1 was received from FBI Special Agent (b)(6); (b)(7)(C) at FBI/WFO located at 601 'D' Street NW, Washington, DC 20001 and transported by the undersigned Technician to the USSS/CSSU Processing Room where it was photographed and secured in (b)(7)(E)

(July 14th, 2023) Item #1 was removed from (b)(5); (b)(7)(E) and transported to (b)(7)(D) for destruction by Technician (b)(6); (b)(7)(C); (b)(7)(D) and Page#3

Item #2

(July 12th, 2023) Item #2 was received from FBI Special Agent (b)(6); (b)(7)(D) at FBI/WFO located at 601 'D' Street NW, Washington, DC 20001 and transported by the undersigned Technician to the USSS/CSSU Processing Room where it was photographed and secured in (b)(7)(D)

Regarding: GM4213-Session1-Scan011
Date: 03 July, 2023

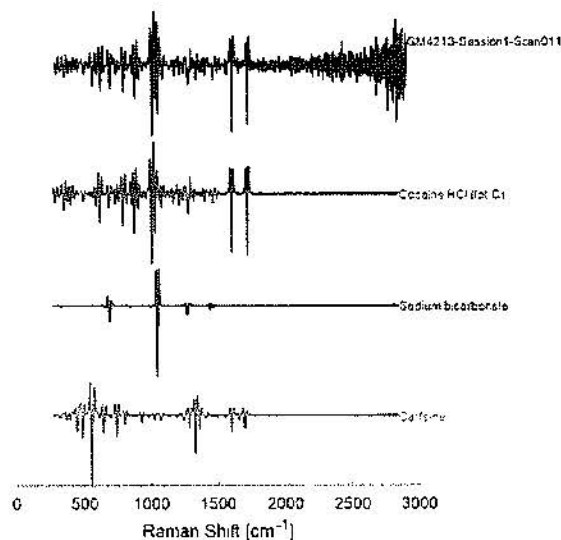

Dear Sir,

Thank you for contacting Thermo Scientific Reachback Support.

Sample information: white powder

GM4213 Scan011

The spectrum of scan 011 contains spectral features similar to those of a mixture of Cocaine HCl, Sodium bicarbonate, and Caffeine. Below are the second derivatives of the spectra for scan 011, Cocaine HCl, Sodium bicarbonate, and Caffeine.

As the (b)(7)(E) is not a trace material detection system, there is always a possibility that other chemicals are present in the sample at concentrations too low to be detected. We encourage you to verify these findings with additional analysis techniques whenever possible.

If you have further questions on this case, do not hesitate to contact us again.

Kind regards,

(b)(6); (b)(7)(C)

On behalf of Thermo Scientific Reachback Support

(b)(6); (b)(7)(C)

Our offices reviewed the report below relating to suspected cocaine being discovered at the White House. We have the following questions that we request you respond to:

1. Provide the date/time that the substance was discovered.
2. Where in the White House was this substance discovered?
3. Who discovered this substance?
4. Has USSS interviewed White House staff related to the discovery of this substance?
5. Has USSS conducted finger print analysis on the container that held this substance? If so, what were the results of that analysis?
6. Which USSS unit is running this investigation?

Secret Service Examining How Suspected Cocaine Ended Up at the White House

An initial test of the white powdery substance found inside the White House on Sunday evening showed it was cocaine. President Biden and his family were away when it was discovered.

July 4, 2023

A small amount of a white powdery substance was found in the White House on Sunday evening, according to a person familiar with the episode, and an initial test by emergency response workers determined that it was cocaine.

President Biden and his family were away at Camp David when a uniformed Secret Service agent found the substance during a patrol of the West Wing around 6 p.m. on Sunday, the person said, prompting a brief shutdown of some of the White House campus as response workers assessed whether the substance was hazardous.

Later that evening, a test of the substance by hazmat crew officials returned a result: “We have a yellow bar saying cocaine hydrochloride,” an official said on a dispatch sent at 8:49 p.m. and logged by a website that gathers the agency’s radio communications.

A person familiar with the investigation, who spoke on the condition of anonymity to discuss an open inquiry, said that the radio dispatch discussing the test of the substance was placed between the District of Columbia Fire Department's hazmat team and other officials within the department.

Anthony Guglielmi, a spokesman for the Secret Service, said that the substance had been found in a "work area of the West Wing" and that another dispatch that said the substance had been found in a White House library was incorrect.

In a statement, Mr. Guglielmi said "the item was sent for further evaluation and an investigation into the cause and manner of how it entered the White House is pending."

He did not confirm or dispute the initial finding that the powder was cocaine.

Vito Maggiolo, a spokesman for the District of Columbia Fire Department, declined to confirm the contents of any of the dispatches, but said officials with the department "were requested to assist the Secret Service as they conducted an investigation."

On Tuesday morning, Mr. Biden returned to the White House with several of his family members.
